Safety Certifications Expertise You Can Trust

Global Safety Requirements

Proof of compliance to safety standards is mandatory in most global markets today.

ITL can help you understand and achieve compliance for these requirements for every market you wish to enter. We can help you acquire certifications for Global Markets through CB Schemes, as well as achieve Approvals and Certification locally through our strategic partnerships with Intertek, TUV Rheinland, CSA, or any of the other major product safety authorities in the world.

Safety Experience and Expertise you can Trust

ITL's Safety Laboratory is foremost appreciated and experienced laboratory of its kind in Israel. Working with us, you have an experienced team of Product Safety experts on your side, operating on your behalf, expediting time to market for your product and reducing costs by testing your products locally. We also have international resources that extend our expertise in electrical safety standards for the markets you wish to enter.

Service you can Trust

At ITL we work with you to guide you and offer design support for compliance with Electrical Safety requirements to address your specific product safety needs, from early state prototype layout, to pre-testing and agency compliance testing and submittal of test data. We are your one-stop-shop for all of your Product Safety needs.
